

1. Access your statistics.

1. Tap the icon  on the bottom menu.
2. Then tap, “week” or “month”.

If you want to check the statistics for a different week or month than the current one...

1. Tap week or month.
2. Then, tap on  to go back to the time interval you want to check.

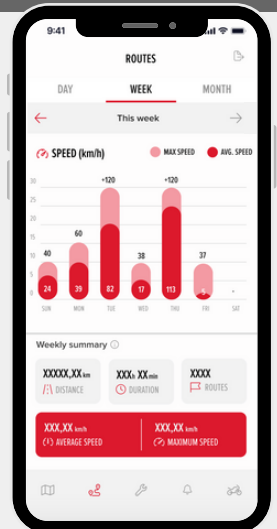

2. Check them out!

What data can you consult?

Distance - Duration - Routes - Maximum and Average Speed

1. **Tap the data** you want to be reflected in the graph. The selected data will be displayed in red.

2. In this case, the combined speed graph is displayed. *

How to interpret the graph?

The graph has **two axes**:

The **vertical axis** shows the values of the selected data.

The **horizontal axis** shows the days of the week or the days of the month.

**Tapping on the bar of a specific day will give you access to the routes taken on that day.*
